

Trainers & Instructors

KoptR Image is looking for trainers for the greater Montreal area (South Shore, Laval, North Shore, Repentigny and Vaudreuil)

Are you an aviation and drone enthusiast (RPAS)? Are you a good communicator and have skills as a trainer? Do you want to be a player in this growing industry?

KoptR image is a training center that has been training professional and recreational drone pilots since 2012. A true pioneer of the field in North America, KoptR Image is located at the Saint-Mathieu-de-Beloeil airport. KoptR Image trains RPAS pilots, but also carries out service contracts for the agriculture, infrastructure, transportation and public safety industries.

Profile

The person we are looking for will be articulate, autonomous, responsible, organized, professional (neat presentation), with a capacity for initiative and adaptation. Ideally, she will have a good knowledge of English.

Job Description

- Our trainer teaches the KoptR Image academic curriculum (TP15263, Pix4D, DJI) to groups of up to 20 student pilots.
- It brings and provides students with the academic materials provided by KoptR Image.
- He/she manages his/her virtual classroom (via Teams) and/or face-to-face classroom appropriately (dynamic attitude, example and integration exercises, respect for the schedule and cleanliness).
- It administers and monitors the progress of student pilots during training.
- It suggests improvements to the course based on the feedback received.
- It follows the guidelines of the company and the lead instructor.
- It is developing other training courses related to the working environment of the drone industry.
- He is available to participate in meetings at or near our head office in Beloeil.
- It is also available for field operations to stay on top of new developments.

Mandatory Skills:

- Using Microsoft 365 and Teams
- Knowledge of DJI's products and enterprise solution (DJI Terra, DJI Enterprise, etc.)
- Knowledge of Pix4D solutions
- Have more than 3 years of field experience as an RPAS pilot for advanced and complex operations.
- Have more than 100 hours of flight time in the last 2 years.
- No criminal record or aviation offense.

Assets

- Private or Commercial Pilot's Licence;
- Be familiar with manufacturers' solutions related to RPAS.
- Flight Review Certificate for Transport Canada.
